

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-67 (canceled)

68. **(currently amended)** A system[[,]] comprising:

~~a database capable of storing vehicle data;~~

~~a processor capable of storing object data in the database;~~

a data store containing vehicle data, object data, and event data, the vehicle data including information about a plurality of moving vehicles, the object data including information about a traveling object, the event data including information about a travel requirement of the traveling object;

a manager configured to obtain the object data and the event data from the data store and capable of associating the object data with the vehicle data, in accordance with the event data, the information about the traveling object with information about a particular moving vehicle from among the plurality of moving vehicles; and

a map generator capable of displaying a map with at least a subset of the vehicle data and at least a subset of the object data information about the particular moving vehicle and information about the traveling object superimposed onto the map.

69. **(currently amended)** The system of claim 68, wherein the vehicle data includes position, speed and direction of travel of the particular moving vehicle.

70. **(canceled)**

71. **(currently amended)** The system of claim 68, wherein the ~~object data~~ the information about the object is superimposed on the map adjacent to the ~~vehicle data it is associated with~~ information about the particular moving vehicle.

72. **(currently amended)** The system of claim 68, wherein the map generator is further capable of redisplaying the map with the superimposed information about the particular moving vehicle and the traveling object [[data]] based on a change in the ~~vehicle or object data~~ event data.

73. **(canceled)**

74. **(currently amended)** The system of claim 68, wherein the map generator is further capable of displaying weather on the ~~generated~~ map.

75. **(currently amended)** The system of claim 68, wherein the manager is further capable of generating an alert when an event occurs that interferes with an estimated arrival time of the particular moving vehicle.

76. **(currently amended)** The system of claim 75, wherein the manager transmits the alert to a device ~~listed in the object data~~.

77. **(currently amended)** A method[[,]] comprising:
storing object data, vehicle data, and event data ~~in a database capable of storing vehicle data~~, the vehicle data including information about a plurality of moving vehicles, the object data including information about a traveling object, the event data including information about a travel requirement of the traveling object;

associating the ~~object data~~ information about the traveling object with ~~the vehicle data~~ information about a particular moving vehicle from among the plurality of moving vehicles, the associating performed in accordance with the event data; and

displaying on an access device a map with ~~at least a subset of the vehicle data~~ information about the particular moving vehicle and ~~at least a subset of the object data~~ the information about the traveling object superimposed onto the map.

78. **(previously presented)** The method of claim 77, wherein the vehicle data includes position, speed and direction of travel of the vehicle.

79. **(canceled)**

80. **(currently amended)** The method of claim 77, wherein the ~~object data~~ the information about the object is superimposed on the map adjacent to the vehicle data it is associated with information about the particular moving vehicle.

81. **(currently amended)** The method of claim 77, further comprising redisplaying the map with the superimposed information about the particular moving vehicle and the traveling object ~~[[data]]~~ based on a change in the ~~vehicle or object data~~ event data.

82. **(canceled)**

83. **(currently amended)** The method of claim 77, further comprising displaying weather on the ~~generated~~ map.

84. **(currently amended)** The method of claim 77, further comprising generating an alert when an event occurs that interferes with an estimated arrival time of the particular moving vehicle.

85. **(currently amended)** The method of claim 84, further comprising transmitting the alert to a device ~~listed in the object data.~~

86. **(currently amended)** A system~~[[,]]~~ comprising:

means for storing object data ~~in a database capable of storing vehicle data,~~ vehicle data, and event data, the object data including information about a traveling object, the vehicle data including information about a plurality of moving vehicles, the event data including information about a travel requirement of the traveling object;

means for associating ~~the object data with the vehicle data,~~ in accordance with the event data, the information about the traveling object with information about a particular moving vehicle from among the plurality of moving vehicles; and

means for displaying a map with ~~at least a subset of the vehicle data and at least a subset of the object data~~ information about the particular moving vehicle and the information about the traveling object superimposed onto the map.

87. **(currently amended)** A computer readable medium having stored thereon a computer program to cause a computer to execute the method of claim 77 ~~a method, the method comprising:~~

~~storing object data in a database capable of storing vehicle data;
associating the object data with the vehicle data; and
displaying a map with at least a subset of the vehicle data and at least a subset of the object data superimposed onto the map.~~

88. **(new)** The system of claim 68, wherein the information about the plurality of moving vehicles includes flight schedules.

89. **(new)** The system of claim 68, wherein the information about the particular moving vehicle includes a location of the particular moving vehicle or a flight status of the particular moving vehicle.

90. **(new)** The system of claim 68, wherein the information about the traveling object includes a name of a person.

91. **(new)** The system of claim 68, wherein the traveling object is any one of a person, a parcel, a box, and a letter.

92. **(new)** The system of claim 68, wherein the information about a traveling requirement of the traveling object is a travel itinerary or a destination of the traveling object.

93. **(new)** The method of claim 77, wherein the information about the plurality of moving vehicles includes flight schedules.

94. **(new)** The method of claim 77, wherein the information about the particular moving vehicle includes a location of the particular moving vehicle or a flight status of the particular moving vehicle.

95. **(new)** The method of claim 77, wherein the information about the traveling object includes a name of a person.

96. **(new)** The method of claim 77, wherein the traveling object is any one of a person, a parcel, a box, and a letter.

97. **(new)** The method of claim 77, wherein the information about a traveling requirement of the traveling object is a travel itinerary or a destination of the traveling object.
